

Delignit AG wins a follow-up order for system floor solutions to the rail sector

- Asian OEM continues to rely on Delignit solutions
- Delivery for commuter rail lines in the Arab region

Blomberg, 18th of February 2019. Delignit AG (ISIN DE000A0MZ4B0), a leading manufacturer of environmentally-friendly hardwood-based products and system solutions, has won a follow-up order for the delivery of system floor solutions in the rail sector. The client is a leading rail manufacturer from the Asian region. The supply of the metro vehicles featuring Delignit floor systems should be completed as early as mid-2019 with an order volume totalling in the mid-six figures.

The rail vehicles, fitted with Delignit Railfloor, are to be used as part of an expansion stage of an infrastructure project on the Arabian Peninsula. The floor, based on European hardwood, meets the high technical requirements for use in passenger transport and also offers weight advantages, with excellent properties in regards to fire protection, sound protection and strength.

This follow-up order, which includes the fittings for over 100 carriages with Delignit Railfloor, underlines Delignit AG's strategic focus on sustainable system solutions which meet the highest technical requirements in the target market of technological applications.

About Delignit Group:

The Delignit Group develops, produces and sells ecological materials and system solutions from renewable raw materials under the brand name Delignit. As a recognized development, project and serial supplier of leading automotive groups, the Delignit Group is, among other things, world market leader for supplying the automotive industry with cargo bay protection and cargo securing systems for light commercial vehicles. With an industry-wide variety of applications and manufacturing range, the Delignit Group serves numerous other technology sectors, for example: as a worldwide system supplier of reputable rail stock manufacturers. Delignit solutions have exceptional technical properties and are further, among other things, used as trunk floors, building equipment and security solutions.

Delignit material is predominantly based on European hardwood, is CO₂ neutral in its life cycle and therefore ecologically superior to non-regenerative materials. The use of the Delignit material therefore improves the environmental performance of customer products and meets their increasing ecological requirements. The company was founded over 200 years ago. The Delignit AG is listed in the Scale Segment of the Frankfurt Stock Exchange.
